

MINI EAR HEARING PROTECTION

PROTECTS HEARING WITHOUT THE PROBLEMS ASSOCIATED WITH STANDARD, UNFILTERED EARPLUGS

OUR MUSIC FILTERS ARE DESIGNED SPECIFICALLY TO GIVE THE USER FLAT ATTENUATION. THIS MEANS YOU DON'T LOSE ANY OF THE MUSIC QUALITY, THE SOUND IS REDUCED TO A SAFE LEVEL.

OUR INDUSTRIAL FILTERS REMOVE THE LOW AND HIGH FREQUENCY NOISE FOUND IN HARSH ENVIRONMENTS THAT CAN DAMAGE HEARING.

Choosing the correct level of hearing protection is vital. Over protection removes the user from his environment, further increasing the level of occlusion and making the user feel detached. Mini Ear acoustic filters are available in a range of fixed attenuation levels suitable for all exposure levels and environments, ensuring that the correct level of noise is reduced.

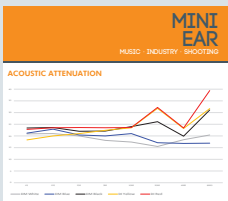

SOME OF THE BENEFITS OF CUSTOM MINI EAR INCLUDE:

- Easily fitted in place – will not fall out when in use
- Tuned to allow natural hearing and speech to be heard
- Can be worn continuously without discomfort
- Made of soft medical grade silicone that can be easily wiped clean
- Breathable filter keeping the ear canal cool and providing all day comfort
- Has no mechanical or electronic parts to move, wear out, contaminate or injure the ear
- NANO Anti Bacterial coating
- Optional neck cord available
- Long lasting, several years lifespan

MINI EAR IS SUITABLE FOR ENVIRONMENTS WHERE EXCESSIVE NOISE IS AN ISSUE, INCLUDING:

- Musicians / Vocalists
- Attending Concerts / Clubs
- Working Environment
- Industrial Workplace
- Motorsport / Motorcycling
- Flight Plugs for Pressure and Stress Relief
- Shooting
- Machine / Power Tool Operation

OUR RANGE OF CUSTOM MINI EAR PRODUCTS INCLUDE INTERCHANGEABLE FILTERS WHICH HAVE BEEN USED SUCCESSFULLY IN THE MUSIC INDUSTRY FOR MANY YEARS.
