

NoiseBarrier™ Hearing Protection

NoiseBarrier™ is an innovative new hearing protection earplug that has been developed at dB Hearing's 'Product Innovation Centre' to provide a high level of hearing protection where excessive noise is an issue. NoiseBarrier™ is fully certified to EN352-2:2002 and is a custom hearing protector that provides exceptional long lasting comfort and a perfect fit.

The NoiseBarrier™ filter intelligently blocks harmful levels of noise whilst allowing desired sound to be heard at a safe level. It is manufactured using soft medical grade silicone and is available in a range of options and colours. NoiseBarrier™ custom noise protection earplugs are widely recommended by Occupational Health and Safety professionals for use in industry as organisations seek to prevent excessive claims for hearing damage and hearing impairment caused by workplace noise. NoiseBarrier™ hearing protection earplugs can also be used by other groups and individuals who want to protect their hearing including:

- Musicians
- Concert Goers
- DJ's
- Motorsport Enthusiasts
- Airline Passengers
- Shooting Enthusiasts
- Skydivers
- The Police
- Armed Forces

NoiseBarrier™ hearing protection earplugs are supplied complete with a storage case, cleaning tool and skin care gel.

Ear impressions are required, please contact us for further information.
