

## WaterBarrier™ Water Protection For Ears

dB Hearing's custom floatable WaterBarrier™ swim plugs form a watertight seal to prevent water entering the ear canal whilst showering, swimming, diving, windsurfing, water skiing, or participating in ironman, triathlon or other water sports.

WaterBarrier™ water protection also protects against irritation and water borne infection. dB Hearing's WaterBarrier™ earplugs are made from the highest quality supersoft silicone and are designed for maximum comfort and performance. WaterBarrier™ features an advanced technology NANO anti-bacterial coating for increased protection. The earplugs are available in a variety of colours and cords are available as an option. Please Note: Although WaterBarrier provides excellent protection, we cannot guarantee them to be 100% waterproof.

Ear impressions are required, please contact us for further information.
